

ANOTHER GREAT INNOVATION FROM HOMAC...

Multi-Seal™

RAB 350 Series

Homac's new **Multi-Seal™ RAB 350 Series** connectors incorporate many new and exclusive features to enhance reliability and ease of installation.

Through-hole cable ports assure complete screw contact, and the exclusive EZ-View inspection windows provide a visual check of full cable insertion. Inward-seal rockets provide easy cable insertion, while the attached plugs allow conductor ports to be resealed. The tethered screw plugs assist quick removal and insertion, while preventing loss. Wide conductor spacing eases installation, and the installation instructions are molded right into the connector.
