

# Ultrathon™ Insect Repellent for Comfort and Safety on the Job

**MRO**  
*Essentials*

*Hard working protection for a full shift of outdoor maintenance and repair*

Ultrathon™ Insect Repellent was originally tested and proven in the bug-infested heat of the Central American jungles. The patented 3M Controlled Release Technology was developed to give the US Military long-lasting, hard-working protection in situations more challenging than encountered in typical outdoor maintenance and repair operations.

That's why Ultrathon™ Repellent is a MRO Essential for workers who want reliable comfort and safety when work puts them within reach of biting bugs.

### Comfort and safety

- Repels mosquitoes that may carry West Nile Virus

- Repels ticks that may carry bacteria that cause such diseases as Rocky Mountain spotted fever, Lyme Disease, and ehrlichiosis
- Repels biting flies, chiggers, gnats, and more that make a hard job even harder with discomfort

### Long-lasting barrier

- Controlled release formulation is slow to evaporate and continues working long after other repellents have dissipated: Up to 8 hours of protection with spray, and up to 12 hours with rub-on lotion
- Keeps working even when heat and humidity beads up the perspiration

- Resists rain and water splashes when the job has to get done no matter what the weather

### User-friendly

- Mellow outdoor scent
- Choice of 6-oz. aerosol or 2-oz. squeeze tube to fit in any tool box
- Convenient spray-through cap sprays upside down for total coverage, including hard-to-reach spots

**Rated #1 for effective repellency by a leading consumer magazine**
