

FUSE HAND™

The Safety Line Fuse Hand operates like a normal disconnect attachment on a hot stick, but when the fuse is picked up, the weight of the fuse closes the jaw to securely capture the fuse. The fuse tool can handle multiple fuse barrel sizes.

The Fuse Tool is made of ballistic grade Nylon which glows in the dark providing maximum visibility.

Cat. No.	Description
92S12	Fuse Hand™

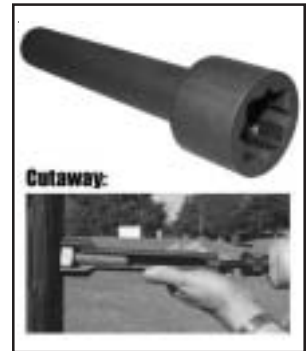

TWIN SPIN SOCKET™

A double square 1" x 1-1/8" socket super imposed at 45 degrees on one end and 1/2" drive on the other end, this socket fits both 5/8" and 3/4" hardware up to a 7-1/2" length and fits nut sizes of 1" and 1-1/8".

The Twin Spin Socket is compatible with a wrench to tighten 5/8" or 3/4" bolts in framing utility poles. An impact adapter is available and sold separately.

Cat. No.	Description
SLDD-4	Twin Spin Socket™
SL3011	Impact Wrench Adapter

RHINO CASE™

The Rhino Case rigid plastic tool holder features a three step tool caddy design for easy access to standard tools (bolt cutters, manual crimping tools, etc.) and places to hold two boring bits. Eliminates tools getting hung up in canvas bags. Two nylon hanger hooks are available for bucket hanging.

Cat. No.	Description
CS011	Rhino Case™
CS47120	Pair of Nylon Hooks, up to 2" lip
