

Osmose® Pole Toppper® and Pole Topper Fluid™

- **Helps protect pole top from moisture, decay and splitting**
- **Clean and easy to install, no fasteners needed**
- **Forms easily to pole and around hardware**
- **Dual protection against UV degradation**
- **Non-conductive**

Osmose®

Osmose® brand Pole Topper® is the most effective way to combat pole top decay and deterioration caused by moisture, weathering and wood-destroying fungi. It was designed to adhere to virtually any pole top, regardless of shape, and to provide a long-lasting bond. In addition, it has been embossed with a low density polyethylene protective film to help prevent ultraviolet degradation. Pole Topper is clean, easy to use and can be stored on line trucks.

1. Peel protective strip

2. Adhere to pole

3. Completed application

Osmose® Pole Topper® helps prevent pole top decay.

Pole Topper has several recommended uses, including:

- Standing Poles
- Reset Poles
- New Poles
- Newly Cut Poles

Pole Toppers are manufactured in a choice of 2 diameters and are packaged 6 per carton.

Pole Topper Fluid™

For even more effective treatment, especially on poles already in service, it is highly recommended to use Pole Topper Fluid before application of the Pole Topper. Pole Topper Fluid will help stop decay, due to the presence of fungus or effects of weathering, from spreading. Pole Topper Fluid is available in 16 oz. plastic bottles, packaged 12 per carton.
